*Join to perfect "Painless Precision"
in your endodontic practice...*

Dr. V. Gopi Krishna, MDS, FISDR is a clinician, researcher and academician of international acclaim. He is the Editor of five reputed textbooks: Grossman's Endodontic Practice - 12th & 13th Edition, Sturdevant's Art and Science of Operative Dentistry - South Asian Edition and Preclinical Manual of Conservative Dentistry - First and second edition. He is the Founder - Director of the Root Canal Foundation that mentors more than 200 dentists a year in improving their endodontic skills.

Root Canal Foundation

Root Canal Foundation based at Chennai, India. is an ISO 9001:2008 certified exclusive endodontic treatment and training centre. We are a one stop destination for patients seeking world class endodontic treatment and for dentists aspiring to learn and deliver the highest quality of endodontic care for their patients.

The Root Canal Foundation has international treatment and training facilities inclusive of SIX state of the art LED dental operating microscopes, dental chairs, japanese phantom head simulators, digital radiography, sonic and ultrasonic systems, electronic apex locators, rotary endo-motors and thermoplasticized obturation systems.

A fully equipped preclinical training area with individual workstations and access to microscopes makes the learning exciting and effective. A mini lecture hall with direct audio-visual feed from the dental operatory allows microscope enhanced demonstrations of access refinement and rotary molar endodontics.

Root Canal Foundation along with our collaborative partners offers its flagship modules at **Dubai (UAE)** and **Guwahati (Assam)**. The infrastructure, course content and faculty would be the same as what is provided at our Chennai centre.

A COURSE TO MASTER CLINICAL ENDODONTICS

Endodontics forms the foundation of a successful clinical practice. The training imparted to students during BDS is not adequate for dentists to practice quality endodontics with confidence and achieve optimal clinical success. Understanding the need of the hour and to bridge this lacuna for general practitioners and fresh graduates; well structured clinical hands on modules has been designed.

Module I --> Essential Endodontics : This **Four day** module would equip a clinician with skills to perform quality endodontic therapy using both hand and rotary instrumentation in molar teeth.

Module II --> Advanced Endodontics :

This **Three day** module would enhance your clinical acumen with hands-on training in post and core placement (metal and fibre post systems), crown preparations and rotary retreatment of endodontic failures.

Module III --> Microscope Training Course :

This **Two Day** course is conducted in our state of the art exclusive microscope training institute having six Japanese phantom head simulators along with individual microscope for each participant. This module would train a participant in Ergonomics, Documentation, Parfocaling, IPD assessment, Microendodontic armamentarium, Instrument Retrieval, Microscope enhanced Retreatment and Perforation Management.

COURSE HIGHLIGHTS

We have trained more than **1000 dentists** from **25 countries** apart from dentists from all over India. Each participant will perform more than 25 root canal exercises, assess more than **50 obturations** with digital radiography and observe more than **200 access cavity preparations** under magnification during this purely clinically oriented program. Our commitment for excellence in endodontic training is unwavering and the facilities offered is unmatched in India.

MODULE-I ESSENTIAL ENDODONTICS :

(Each participant receives an endodontics starter kit comprising of consumables and materials along with a complimentary copy of Grossmans Endodontic Practice - 13th edition). Module I is our popular four day program which will make you proficient in doing routine rotary molar endodontics.

Chennai : **INR 35000** Dubai: **AED 4500** Guwahati: **INR 40000**

MODULE-II ADVANCED ENDODONTICS :

(Each Participant receives an endodontic advanced kit comprising of consumables and materials). Module II is our niche three day program which is recommended for participants interested in advanced work after their completion of module I.

Chennai : **INR 35000** Guwahati: **INR 35000**

MODULE-III MICROSCOPE TRAINING COURSE :

This two day course is for endodontists and clinicians who want to learn the ergonomics and principles of using a dental operating microscope in their clinical practice.

Chennai : **INR 35000** Dubai: **AED 4000**

- Each module has exhaustive lectures, patient demonstrations and assessment of the participants hands-on work under dental operating microscopes.
