Master Class Three Day Module on Direct and Indirect Esthetics

Masterclass Three day esthetic training on direct anterior composites, laminate veneers and complex rubber dam isolations is for dentists who want to deliver the highest standards of esthetic care to their patients and for those who want to embark on an esthetics. This clinically oriented mentorship program would train you on the three foundational principles namely direct esthetics with composites, indirect esthetics with lithium disilicate laminate veneers or with All ceramic crowns based on the clinical scenario. This module equips a clinician with skills and knowledge to plan the treatment phase, clinically execute and photographically document their esthetic work. This process would help in better lab communication, improving patient awareness.

ENDO FINISHING SCHOOL BY ROOT CANAL FOUNDATION : (EFS)

Root Canal Foundation was established by Dr V Gopikrishna, an internationally acclaimed academician and endodontist as a treatment and resource centre for mentoring dentists in enhancing their clinical skills. EFS has empowered more than 2000 dentists from over 25 countries and 150 training modules so far over the past decade. EFS has state of the art training facilities inclusive of 8 Dental Operating microscopes, phantom head training simulators and a-v facilities for interactive teaching and learning. EFS has successfully completed more than 100 training modules so far over the past 10 years.

DR DEEPAK MEHTA, M.D.S, PhD

He is conferred the Diplomat status of the American Board of Aesthetic Dentistry (ABAD) in the year 2018. He received his PhD in Dental Materials from Tohoku University, Sendai, Japan in 2015. Recipient of the “Outstanding Dentist of the Year 2013” award presented by Famdent-Excellence in Dentistry Award. He is a Contributing author in the text book on Restoring with Flowables by Douglas Terry (2017), What’s in your Mouth? Your guide to a Lifelong Smile. (Quintessence Books, 2014).

DR S LAKSHMI, M.D.S, MICOI (USA)

Dr. Lakshmi is actively involved in exclusive Aesthetics and Prosthodontics practice at Root Canal Foundation since 2003. She was a former Professor of Prosthodontics and implantology at Meenakshi Ammal Dental college, Chennai. She is a member of good standing of European Society of Cosmetic Dentistry since 2016. She received the certification of Mastership in Implantology from International congress of oral Implantology in 2018. She has authored 5 books of Prosthodontics titled ‘PRECLINICAL MANUAL OF PROSTHODONTICS’ by Elsevier Publications.

DAY 1 (9.30 AM – 6 PM) Anterior Adhesive Direct Restorations (AADR)	DAY 2 (9.30 AM- 6 PM) Posterior Adhesive Indirect Restorations (PAIR)	DAY 3 (9.30 AM- 6 PM) Anterior Indirect Veneers
PRELEARNING • Direct composite restorations of veneers, angle build ups, proximal restorations. • Science of light curing • Finishing and polishing protocol • Case discussion	PRELEARNING Biomimetic Restorative dentistry – Posterior adhesive indirect restoration (Onlays, Overlays & Veneerlays. <u>Learning Objectives:</u> • Cavity Dentin Optimisation • Deep Margin Elevation • Preparation designs • Digital workflow – Intra oral scans & scanning under Rubber dam. • Adhesive bonding protocols	PRELEARNING • Guidelines for dental esthetics • Choice of all ceramics • Treatment planning for veneers • Preparation guidelines for veneers and crowns • Cementation protocols of veneers
DEMONSTRATION & HANDS-ON Direct Composite Veneers Demonstration of Handson workshop <u>Composite Layering</u> • Direct Composite Veneers • Step by step restorative workflow	DEMONSTRATION & HANDS-ON • Cavity dentin optimisation & Deep Margin Elevation. • Preparation design – Overlay • Digital workflow – Intra oral scans and scanning under Rubber dam. • Step by Step bonding protocol.	DEMONSTRATION & HANDS-ON • Making of putty index • Preparation of veneers and crowns • Impression and provisionals • Cementation protocol for laminate veneers.

A NEW APPROACH TO COMPOSITE LAYERING

(DAY 1 AND 2)

Learn how composite dentistry can benefit you and your patients, adding value to your practice

COMPOSITE HANDS-ON

These 2 days you have lecture and hands-on presentation packed with how-to and will show you how to achieve perfection with free hand bonding.

You will learn how to get consistent, reliable results and will receive recipes for success in every Restorative situation..

Course Exercises:

- Create a composite veneer on central incisor with a focus on layering, ideal morphology, contouring, finishing, and polishing.
- Fabricate Onlays, Overlays and gather knowledge about Posterior adhesive indirect Restorations
- Learn how to make Digital impressions, Cementation Protocol of Overlays

Learning Objectives:

- When and how to use different composite materials, including opaques and tints
- Understand translucency, opacity and opalescence: why all composite resin is not created equal
- Sequential steps of the layering technique for successful anterior composite restorations
- Realize the importance of line angles, height of contour & surface textures.
- Learn simple, intuitive finishing protocols to allow the operator to produce highly polished restorations that mimic natural enamel.
- Learn more about immediate dentin sealing (IDS), polymerization shrinkage and shrinkage stress
- How to fabricate Indirect Partial coverage restorations, semi direct restorations

“A NEW APPROACH TO VENEERS”

(Day 3)

This day you have half day lecture and half day hands on presentation which will give you an overview of guidelines for dental aesthetics, selection of choice of all ceramic restorations.

You will learn how to plan for indirect veneers and various preparation guidelines for indirect veneers and crowns.

COURSE EXERCISES

Making of putty index and preparation of veneers and crowns for 6 or more anterior teeth followed by clinically oriented impression and Provisionals for indirect veneer restorations.

LEARNING OBJECTIVES

- When and how to select all ceramic materials for veneers.
- Understand different guidelines and planning for veneers.
- Sequential steps in cementation protocols for veneers.
